

MAMTA YADAV

Full Stack Developer | AI-Integrated Applications

+91-9888695086 | ✉ mamttta226@gmail.com | [🌐 linkedin.com/in/mamta-dev](https://www.linkedin.com/in/mamta-dev) | github.com/mamta653

Full Stack Developer with internship experience in React, Node.js, and REST API integration on a production health platform. Currently developing Salus AI — a full-stack telehealth platform with real-time video, JWT authentication, and PostgreSQL — with AI symptom analysis module in active development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL
Frontend: React.js, Tailwind CSS, HTML5, CSS3
Backend: Node.js, NestJS, Express.js, REST API Design
Databases: PostgreSQL, MongoDB, TypeORM
AI & Automation: OpenAI API, Gemini API, n8n Workflows
Tools: Git/GitHub, Postman, Figma, Nodemailer

INTERNSHIP EXPERIENCE

Full Stack Developer Intern | CeipaLabs — Remote Nov 2025 – Feb 2026

Built frontend features for a production health platform using React.js — developed login page, doctor dashboard, and consultation UI components, consuming REST APIs to connect frontend with backend services

Worked across assigned modules end-to-end — scoped, built, and shipped features iteratively within an Agile remote team environment using React.js, Node.js, and Git

PROJECTS

Salus AI — Telehealth Platform (Full Stack Project) | TypeScript · NestJS · React · PostgreSQL · TypeORM · Tailwind CSS
github.com/Mamta653/Aegis-backend | github.com/Mamta653/Aegis-frontend

Developing a full-stack telehealth platform enabling patients to book appointments, consult doctors via live video, and manage health records — implemented with 9 REST APIs, 4 PostgreSQL tables, and 7 reusable React components

Implemented JWT authentication, bcrypt password hashing, and email-based password reset with token expiry via Nodemailer — architected to support OpenAI/Claude API integration for AI symptom analysis

Integrated Daily.co WebRTC API for real-time video consultations with unique room creation, secure token generation per session, and JWT-guarded protected routes

HACKATHONS

ABM Automation Platform | Node.js · Express.js · MongoDB · REST APIs | KocherTech Hackathon 2025 (24-hour sprint, team of 3 · Shortlisted)

Built an Account-Based Marketing automation platform that eliminated 2-3 hours of daily manual outreach work — automatically identifying high-value B2B leads, generating personalized email content per target company, and triggering outreach in minutes

Engineered full REST API backend with Node.js and Express.js — implemented lead scraping, company-specific data extraction, and automated email generation pipeline with MongoDB for lead storage and tracking

Reduced manual prospecting effort to near-zero by automating the entire B2B outreach workflow end-to-end — from lead identification to personalized email delivery — improving team productivity and outreach consistency

EDUCATION

Guru Nanak Dev University, Amritsar, Punjab 2023 – 2026

Bachelor of Computer Application, CGPA: 7.5

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Operating Systems

Govt Girls Sen Sec School, Amritsar, Punjab 2022

PSEB, Class XII, 92.2%

BhaBha Public School, Amritsar, Punjab 2020

PSEB, Class X, 85%
