

MAMTA YADAV

Full Stack Developer | AI-Integrated Applications

+91-9888695086 | [✉ mamttta226@gmail.com](mailto:mamttta226@gmail.com) | [🌐 linkedin.com/in/mamta-dev](https://www.linkedin.com/in/mamta-dev) | github.com/mamta653

Full Stack Developer with production experience in TypeScript, NestJS, PostgreSQL, and AI API integration (OpenAI, Gemini). Comfortable owning backend architecture end-to-end and currently adding Docker & Kubernetes to the toolkit.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, NestJS, Express.js, Tailwind CSS

Databases & Tools: PostgreSQL, TypeORM, Git/GitHub, Postman, Figma

APIs & Automation: REST APIs, OpenAI API, Gemini API, n8n Workflows

INTERNSHIP EXPERIENCE

Full Stack Developer Intern | CeipaLabs — Remote

Nov 2024 – Feb 2025

Contributed to development of a production health platform — built and integrated REST APIs, developed frontend features using React.js and JavaScript, and collaborated in a remote team environment

Took ownership of assigned modules end-to-end, working across the full stack with React.js, JavaScript, and REST API integration to scope and ship features iteratively

PROJECTS

Aegis AI — Telehealth Platform (In Progress) | TypeScript · NestJS · React · PostgreSQL · TypeORM · Tailwind CSS

github.com/Mamta653/Aegis-backend | github.com/Mamta653/Aegis-frontend

Built full-stack telehealth platform with 9 REST APIs, 4 PostgreSQL tables, and 7 reusable React components — enabling live video consultations, appointment booking, and digital health record management

Implemented JWT authentication, bcrypt password hashing, and email-based password reset with token expiry via Nodemailer — architected to support OpenAI/Claude API integration for AI symptom analysis

Integrated Daily.co WebRTC API for real-time video consultations with unique room creation, secure token generation per session, and JWT-guarded protected routes

NoteMind — Notion-like Productivity App | JavaScript · HTML5 · CSS3 (Migrating to React + Node.js) |

github.com/Mamta653/ToDo-app

Feature-rich productivity app with named lists, task priorities, due dates, drag-and-drop reordering, dark mode, and keyboard shortcuts — structured 20-day roadmap with PWA support and Vercel deployment planned

HACKATHONS

ABM Automation Platform | Node.js · Express.js · MongoDB · REST APIs | KocherTech Hackathon 2025 (24-hour sprint, team of 3 · Shortlisted)

Built an Account-Based Marketing automation platform that eliminated 2-3 hours of daily manual outreach work — automatically identifying high-value B2B leads, generating personalized email content per target company, and triggering outreach in minutes

Engineered full REST API backend with Node.js and Express.js — implemented lead scraping, company-specific data extraction, and automated email generation pipeline with MongoDB for lead storage and tracking

Reduced manual prospecting effort to near-zero by automating the entire B2B outreach workflow end-to-end — from lead identification to personalized email delivery — improving team productivity and outreach consistency

EDUCATION

Guru Nanak Dev University, Amritsar, Punjab

2023 – 2026

Bachelor of Computer Application, CGPA: 7.5

Govt Girls Sen Sec School, Amritsar, Punjab

2022

PSEB, Class XII, 92.2%

BhaBha Public School, Amritsar, Punjab

2020

PSEB, Class X, 85%
